

To the FCC:

I recently subscribed to satellite radio, and I am already a fervent supporter of the format. As a frequent traveler on the road, satellite radio has been a godsend to me, as I do not have problems with reception or having to dial through an empty radio dial to find something to listen to. Moreover, the traffic and weather information is important to me as I can easily locate the traffic channel for any city I visit and know the traffic within seconds, not minutes. Last, the weather channels are valuable tools for the traveler.

I love being able to listen to the radio commercial-free, and satellite radio carries programming that fits my lifestyle and tastes better than any broadcast radio station ever has. Please reject NAB's petition 04-160 and support satellite radio's ability to provide the kind of programming we all deserve.

Respectfully,

Matt Kreutzrer
